Professional Summary

AI Engineer specializing in AI driven solutions and cloud infrastructure optimization. Experienced in designing production ready machine learning pipelines and scalable backend systems. Strong background in full stack development, DevOps automation, and enterprise software architecture.

Professional Experience

AI Ops Engineer Internship

ODDO BHF

Feb 2026 – Aug 2026

Tunis, Tunisia

Build AI driven Platform to enhance the resources management (ram ,cpu) for openshift clusters.

- Built Transformer-based forecasting models to predict workload spikes across **2,900+ OpenShift pods**.
- Optimized CPU and memory allocation using real-time infrastructure metrics.
- Developed an enterprise monitoring dashboard for anomaly detection and cluster health.
- Collaborated with DevOps teams to improve reliability and reduce cloud resource waste by 30%.
- OpenShift • Kubernetes • Transformers • Python • Time-Series Forecasting • Scikit-Learn • Azure Devops

Freelance Software Developer

Wize-Ailien

Oct 2025 – Nov 2025

Tunis, Tunisia

Build of a web application to handle invitations .

- Automated processing of **300+ VIP invitations** using Excel pipelines.
- Built secure QR-based event access and email automation.
- Used Celery and Redis for high-throughput asynchronous processing.
- Python • Django • Celery • Redis • Excel • QR APIs

DevOps Engineer Internship

Wize-Ailien

Jul 2025 – Sep 2025

Tunis, Tunisia

Infrastructure Setup for a New Startup .

- Automated build and deployment pipelines using Jenkins.
- Managed GitLab CE servers and production Linux infrastructure.
- Deployed scalable web applications with Nginx and NExt.js.
- Jenkins • GitLab • Linux • Docker • Nginx • Next.js

Data Engineer Internship

Cytekia

Jul 2024 – Aug 2024

Tunis, Tunisia

Automation of Data Processing for Risk, Audit and Incident Management .

- Developed ETL pipelines for structured audit datasets.
- Cleaned and transformed heterogeneous spreadsheet data.
- Designed MongoDB schemas for analytical reporting.
- Python • Pandas • MongoDB • React.js • Express.js • Node.js • Excel • ETL

Full Stack Developer Internship

Spotlight

Feb 2023 – Jun 2023

Tunis, Tunisia

Developing a website application for Collaboration of international Researchers on Neurosurgery CIRoN .

- Implementing Jwt Connection
- Implemented RBAC authentication modules .
- Built custom scraping modules .
- Payment integration flows .
- Django • React • PostgreSQL • REST APIs

Academic Projects

Screen Forge

Sep 2025 – Dec 2025

AI-Powered Automated Candidate Screening Platform

- Engineered a Retrieval-Augmented Generation (RAG) assistant leveraging Qwen LLM to aid HR managers in dynamically formulating role-specific technical interview queries.
- Developed an interactive interview preparation simulator for job candidates, generating realistic tailored domain questions to improve candidate readiness.
- **Tech Stack:** FastAPI, PostgreSQL, RAG, Qwen LLM, JavaScript

Smart Transfer Platform

Feb 2025 – May 2025

An AI-powered sports analytics web application designed to optimize football player recruitment and tactical alignment.

- Improved Player Valuation Accuracy using a deep learning model with 91.8% score.
- Developed a Player Fit Recommendation Engine based on team tactics using the Hungarian algorithm.
- Django • JavaScript • Deep Learning • Graph Theory • PostgreSQL

Client Churn Prediction

Oct 2024 – Dec 2024

An end to end data science project focused on predicting customer retention metrics through comparative predictive modeling.

- Designed an end-to-end machine learning pipeline from raw data ingest to evaluation.
- Leveraged and evaluated decision trees, random forests, logistic regression, and XGBoost.
- Compared multiple classification models to maximize predictive performance, achieving 91.9% accuracy.
- Python • Scikit-Learn • Pandas • Machine Learning

Travel Agency Platform

Feb 2024 – May 2024

A multi-tiered booking and management ecosystem facilitating client operations and community interaction.

- Built a cross-platform travel management application with synchronized local and remote storage.
- Designed and implemented the interactive community forum module and user feed profiles.
- JavaFX • Symfony • MySQL

Technical Skills

Programming Languages: Python • Java • Go • C • C# • JavaScript • Bash

AI / Machine Learning: Machine Learning • Deep Learning • Transformers • LLMs • RAG • Embeddings • Semantic Search • Amazon Chronos

Web & Backend Frameworks: Django • FastAPI • Spring Boot • .NET Core • Next.js • Angular • React • GraphQL • REST

Cloud / DevOps / MLOps: Docker • Kubernetes • OpenShift • Jenkins • GitLab • MLflow • Nginx • ElasticSearch • Kibana

Databases & Big Data: PostgreSQL • MySQL • MongoDB • SQLite • Oracle PL/SQL • Spark • Hive • HBase • Neo4j

Education

ESPRIT, Tunis Engineering Degree in Computer Science	2023 – Present
Faculty of Sciences of Tunis Bachelor's Degree in Computer Science	2020 – 2023
Lycée Rue de Russie Baccalaureate in Experimental Sciences	2018 – 2020

Languages

Arabic (Native)	French (Professional)	English (Professional)
